

FONOCON

Silent View

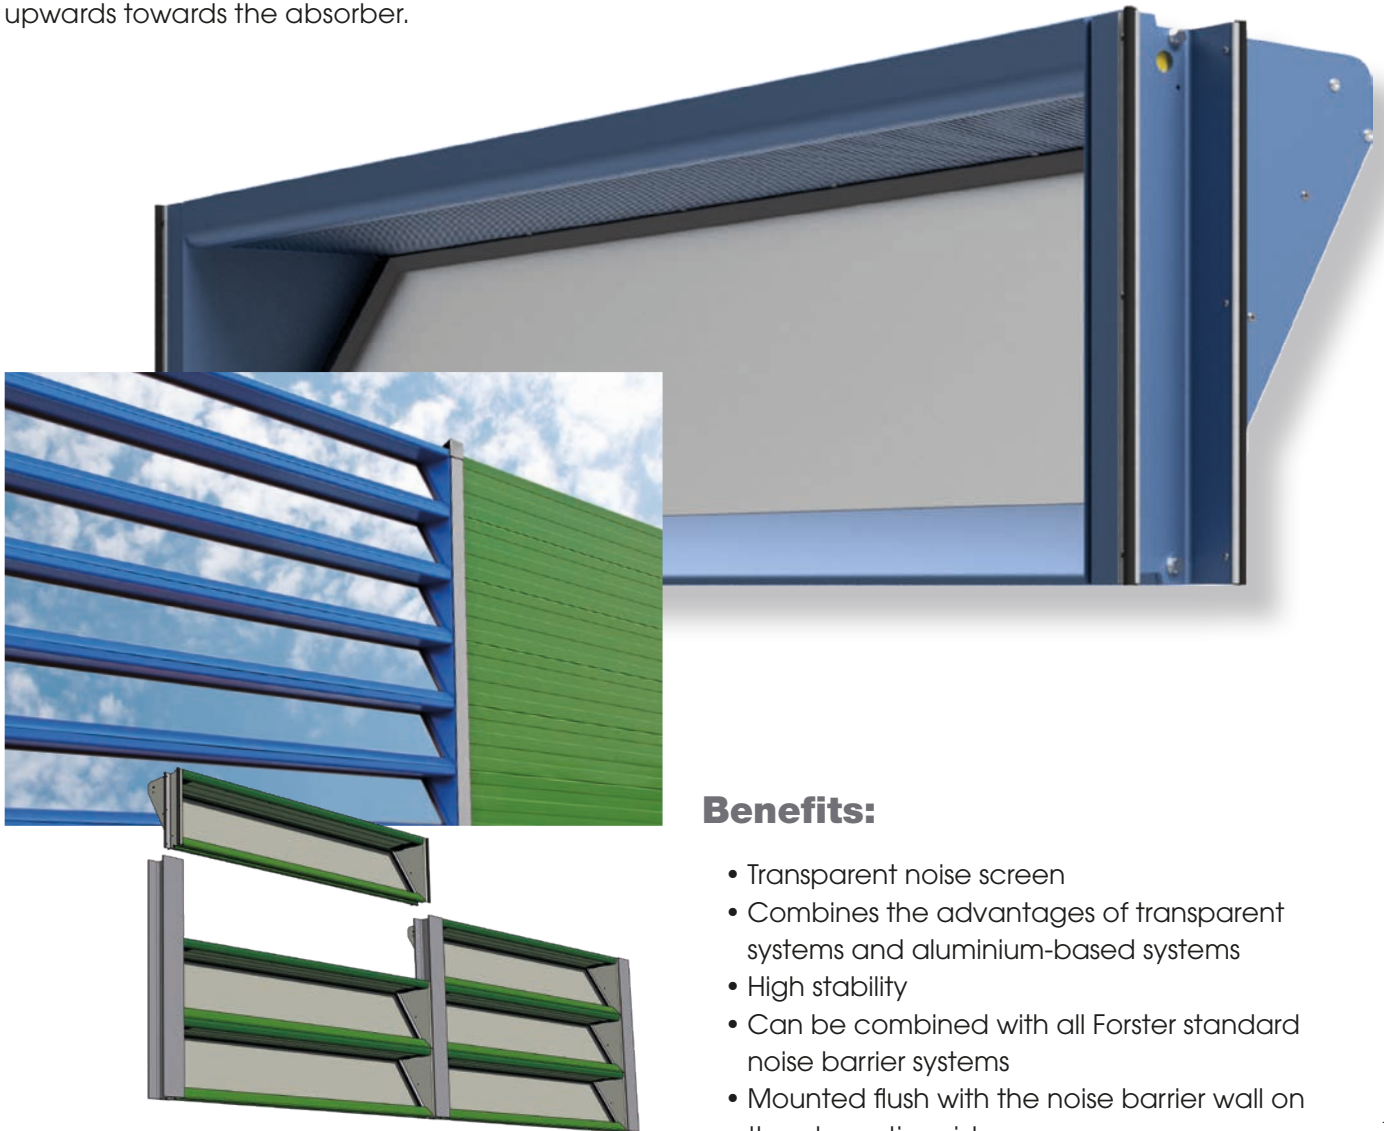

**The noise barrier that
offers a clear view**

The product name in UK is "FONOCON type GKE A30-P".

The noise barriers that offers a clear view

Our transparent and noise-absorbing system combines the advantages of two noise screening systems. It consists of an aluminium frame and a transparent filling that is slanted at an angle of 30 degrees. The absorbing part of the element is horizontally aligned which provides weatherproofing. Incoming noise is reflected across the transparent slanted panels upwards towards the absorber.

Benefits:

- Transparent noise screen
- Combines the advantages of transparent systems and aluminium-based systems
- High stability
- Can be combined with all Forster standard noise barrier systems
- Mounted flush with the noise barrier wall on the absorption side
- Tested under direct sound field conditions pursuant to EN 1793-5

Please pay attention to the specific note for United Kingdom: In order to avoid any misunderstandings we have named this product in UK „FONOCON type GKE A30-P“. „FONOCON FORSTER NOISE CONTROL“ is a Community Trade Mark registered under Nr 012943619.
